

1912 ACCELERANTE PER POLIURETANICI NEW

Description and Use

Additive indicated to reduce the hardening times to the touch and in depth of paint products hardened with isocyanates. The additive is ready to use and can be used in a maximum quantity of 5% of the product to be applied.

Application

Application method:

- Use the additive strictly following the mixing, application and preparation instructions described in detail in the technical data sheet of the product to be applied.

Storage life

If stored in a cool, dry place, away from sources of heat and sheltered from sunlight, in its sealed original packaging, the product has a shelf life of 24 months. Check the product's shelf life by referring to the production batch number shown on the packaging. The batch number is made of eight numeric characters in which the first four digits identify the year and month of production. Once the product has expired, it must be disposed of in accordance with the current legislation.

Technical features

Appearance	clear, colorless liquid
Specific weight	0.88 kg/liter ($\pm 0,01$)
Water	max 0.1 %
The data are measured at a temperature of 20°C.	

Warnings

- For professional use only.
- Always refer to the safety data sheet for the relevant products.
- Solvents or thinners used for cleaning tools, as well as any product residues, must not be released into the environment or poured down domestic drains. The recipient/product/thinner or cleaning solvent must be disposed of in accordance with national regulations.
- It is recommended to acquire all the material required to finish the work of the same batch.
- The information provided on this technical datasheet is based on our technical and practical knowledge and experience. The technical data refer to the average characteristics of the basic product and are determined under controlled laboratory conditions. The variability of the raw materials available on the market and the tinting of the product can lead to slight deviations in the declared values, in the colour and in the aesthetic effects obtained. It is therefore necessary for the purchaser/user to personally verify, before application, the suitability of the product for the intended use, in particular when different batch numbers of the same material are used in the same work/site.

The above mentioned data are meant to facilitate our customers in the use of our products. IMPA is not responsible for applications of products carried out beyond its direct control.
